

Dear Parent

Our school is celebrating Spex Day on _____. We will be learning about all the different aspects of visual impairments on the day.

Spex Day is being held in support of the National Council for the Blind of Ireland (NCBI), who provide a support system for people living with visual impairments throughout the country.

To take part pupils are being asked to decorate cardboard glasses frames and wear them for the day. It's a great opportunity for your child to promote the fun aspect of wearing glasses and showcase their creativity. There are prize certificates for the best glasses design, and the opportunity to enter a national competition for a Faber-Castell hamper for your class.

The suggested donation amount is €1 to take part, but please feel free to give as little or as much as you want. All proceeds will go directly to the NCBI.

The NCBI is Ireland's largest sight loss charity. They provide practical training and emotional support to help those living with visual impairments lead independent lives.

We hope that you are happy for your child to participate in raising funds for such an important cause. You can find out more about Spex Day and the NCBI at www.spexday.ie

Yours sincerely,

School Principal
